

Nguyen Van Thang

FULL-STACK DEVELOPER

Final-year Information Technology student graduating in 2026, focused on Full-Stack Web Development. Hands-on experience with React/Next.js, TypeScript, Node.js, NestJS, Express.js, and PostgreSQL, including distributed systems, concurrency, real-time communication, authentication, testing, and Docker. Seeking a Full-Stack Developer Intern/Fresher position.

FREELANCE & INDEPENDENT WORK

• Jan 2025 – Present

Freelance Full-Stack Developer · Remote / Project-Based

- Delivered client-based full-stack web applications from requirements through milestones within a developer group.
- Built React/TypeScript interfaces and REST APIs with Node.js, Express.js, and PostgreSQL, including data modeling, validation, and JWT authentication.
- Containerized environments with Docker and automated linting/testing through GitHub Actions, Jest, and Supertest.

FEATURED PROJECTS

• May 2026 – Sep 2026

EV Charging Orchestration Platform

Capstone / Academic Engineering Project

Distributed system for real-time EV charging, telemetry, and slot booking.

- Architected an 8-service distributed system with 104 REST endpoints across IAM, Session, Infrastructure, Billing, Telemetry, Notification, Analytics, and OCPP Gateway.
- Implemented concurrent booking with PostgreSQL SELECT FOR UPDATE and time-range conflict checks to prevent overlapping allocation.
- Designed RabbitMQ messaging with Transactional Outbox and idempotency-key validation for reliable duplicate-event handling.
- Built Next.js/React interfaces and integrated VNPay, TOTP/MFA, ClickHouse telemetry, Docker Compose, GitHub Actions, and Jest.

Tech: React, Next.js, NestJS, TypeScript, PostgreSQL, Redis, RabbitMQ, Docker, Flutter, Jest

• Nov 2025 – Sep 2026

StudyHub — Collaborative Social Learning Platform

Full-Stack Academic Project

Microservices platform for study groups, document sharing, and real-time chat.

- Architected 6 Express.js microservices for auth, user, group, document, chat, and notification behind Kong API Gateway, with a React 18 SPA of 59 components/pages.
- Implemented OAuth 2.0 (Google, Facebook, GitHub, LinkedIn), JWT access/refresh rotation, 4-role RBAC, Socket.IO messaging, and RabbitMQ notifications with Transactional Outbox.
- Applied polyglot persistence with MySQL 8 for four relational services and MongoDB 6 for chat/notifications, with Cloudinary storage and Docker Compose.

Tech: React 18, Vite 7, Node.js, Express.js, MySQL, MongoDB, Socket.IO, RabbitMQ, Kong, Docker, Redux Toolkit, i18next, Cloudinary

• Aug 2025 – Sep 2026

Victorfolio — Developer Portfolio & Real-Time Web App

Personal Project

Interactive portfolio with real-time visitor features and reusable UI components.

- Built a React 19/TypeScript application with bilingual EN/VI localization and reusable Radix UI/Tailwind components.
- Implemented real-time visitor presence and synchronized remote cursor tracking with Socket.IO, plus GSAP, Framer Motion, and Three.js interactions with Cloudflare Pages deployment.

Tech: React 19, TypeScript, Vite, Tailwind CSS, Radix UI, Socket.IO, GSAP, Framer Motion, Three.js, Cloudflare Pages

📍 Ho Chi Minh City, Vietnam
